1. This application contains claims directed to the following patentably distinct species:

Species A, that directed to the first substrate being on a roller (claim 7);

Species B, that directed to the first substrate being a heated embosser (claim 8);  
and

Species C, that directed to photopolymerization (claims 14, 15, 17 and 18). The species are independent or distinct because they constitute different embodiments of the instant invention which do not necessarily have to be employed together and in fact would be considered to constitute separate inventions if they were to be set forth as independent claims. The roller mold does not require a heated embosser and the heated embosser does not have to be on a roller. Even more clearly, the photopolymerization is distinct from roll molding and embossing.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claims 1-6, 10, 11, 13 and 16 are generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which depend from or otherwise require all the limitations

Art Unit: 1732

of an allowable generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species.

MPEP § 809.02(a).

2.Applicant's comments concerning the art rejection and the amended claims are noted. However, the response thereto will be held in abeyance pending an election.

3.Any inquiry concerning this communication or earlier communications from the examiner should be directed to Mathieu D. Vargot whose telephone number is 571 272-1211. The examiner can normally be reached on Mon-Fri from 9 to 6.
